Why the future
hangs on PEG's!

Thursday November 12th, 17.30

**Grand Cayman/Puerto Rico Suite,
Orlando World Center Marriott**

It's time to think beyond silicone and take a closer look at PEG Hydrogels as the new class of materials of choice for contact lenses. The evidence is mounting. Initial trials have already demonstrated their excellent oxygen permeability. Now in an exclusive preview, we'd like to tell you more

Your update on the next generation material for contact lenses

PEG's and their fascinating properties

Emeritus Professor Neil Graham
University of Strathclyde

The way forward

Wade Tipton
CEO Ocutec

Preliminary results from patient acceptance studies

Dr Graeme Young
Visioncare Research

Cocktails and light refreshments will follow the presentations. Please feel free to bring along a colleague for what is sure to be one of the talking points of the meeting.
